FINALLY! DRILL PRESSES DESIGNED SPECIFICALLY FOR WOODWORKING

Powermatic's 18" PM2800 comes loaded with thoughtful, practical improvements over other drill presses. For example, twin LEDs illuminate the bit from the front for shadow-free alignment on your mark. And extension tables stretch workpiece support to 26" wide. The split fence expands with the tables and includes a dust-collection port. Throw in a 5/8" keyless chuck and quill-feed handles that mount on either (or both) sides of the head, and you'll see why we like this press.

Price: \$800
